

PurAire LiftPro-1&2

Mini Bipolar Ionizer for Lifts or Small Spaces

Specifications LiftPRO 1 and 2

Product information

Air volume	15 m ³ /h or 60 m ³ /hr
Application area	5~15 m ² or 20 - 30 Sqm
Shell material	Aluminium alloy
Weight	300 g or 1 kg
Product size	195x100x60 or 260x175x60 mm
Noise	≤30 dB
Filter Type	Primary Filter or HEPA11

Electrical

Rated Voltage	12V DC / 24V DC
Power	7 W

Ionization Tube

Quantity	1 pcs
Size	60 or 80 mm
Estimated Tube Life	17000 Hours

With Odours, Viruses like Covid-19, Tobacco smoke smells floating in your air, it is important to be able to neutralize and eliminate them in your lifts or smaller spaces.

The PurAire LIFTPRO 1 or 2 Bipolar Ionization unit is designed to be wall mounted to quietly, continuously eliminate those odours, viruses, germs, and bacteria, protecting you and your guests from unpleasant odours and disease.

The airflow through the HEPA filter and over the ionization tube produces powerful bipolar oxygen ions that flow into the space and saturate the indoor space providing constant and effective purification. The LIFTPRO provides continuous disinfection to “actively” sanitize and deodorize the indoor air.
