

PurAire LiftPro-1^{BS}

Mini Bipolar Ionizer for Lifts or Small Spaces

SPECIFICATIONS

Product information

Air volume	15 m ³ /h
Application area	5~15 m ²
Shell material	Aluminium alloy
Weight	300 g
Product size	195*100*60 mm
Noise	≤30 dB

Electrical

Rated Voltage	12V DC / 24V DC
Power	6 W

Ionization Tube

Quantity	1 pcs
Size	60 mm
Estimated Tube Life	17000 Hours
Material	Various composite materials, stainless steel outer mesh

With Odours, Viruses like Covid-19, Tobacco smoke smells floating in your air, it is important to be able to neutralize and eliminate these contaminants in your lifts, or small spaces to assure your guests and staff of a safe and pleasant environment.

The PurAire LIFTPRO's Bipolar Ionization unit is designed to be wall mounted in your lift or room to quietly, continuously eliminate those odours, viruses, germs, and bacteria, protecting you and your guests from unpleasant odours and disease.

The airflow through the HEPA filter and over the ionization tube produces powerful bipolar oxygen ions that flow into the space and saturate the indoor space with the ions providing constant and effective purification. The LIFTPRO provides continuous disinfection to “actively” sanitize and deodorize the indoor air wherever it is installed.
